UETP-MEMS Course: Resonant microsensors,

Thomas Fabula, Hans-Joachim Wagner, Institute of Microstructure and Information Technology (IMIT), Villingen-Schwenningen, Germany
Albert Prak, MESA Research Intitute, University of Twente, Enschede, the Netherlands

Inhaltsverzeichnis: (Datei: INHVERZ.WP6)

Contents

Intro	Introduction to MEMS and resonant sensors	
1.1	Micro-electro-mechanical-systems	1.1
1.2	Resonant sensors	1.3
1.3	Scope of this course	1.6
Refere	ences	1.8
Demonstrations		4.1
4.1	Resonant sensor devices	4.1
4.2	Finite-Element-Method	4.3
4.3	Numerical modeling of resonant sensors	4.4
4.3.1	Load dependent frequency change	4.4
4.3.2	Thermal behaviour of resonant sensors	4.6
4.3.3	Optimization of a 'beam-on-diaphragm' pressure sensor	4.7
4.4	PC-based layout and FEA demonstrations	4.10
4.5	ANSYS program source listings	4.11
References		4.19
	1.1 1.2 1.3 Reference 4.1 4.2 4.3 4.3.1 4.3.2 4.3.3 4.4 4.5	 1.2 Resonant sensors 1.3 Scope of this course References Demonstrations 4.1 Resonant sensor devices 4.2 Finite-Element-Method 4.3 Numerical modeling of resonant sensors 4.3.1 Load dependent frequency change 4.3.2 Thermal behaviour of resonant sensors 4.3.3 Optimization of a 'beam-on-diaphragm' pressure sensor 4.4 PC-based layout and FEA demonstrations 4.5 ANSYS program source listings
